Non Conventional Course Report
On
Introduction to Financial Economics

The Department of Economics successfully completed the Non Conventional Course titled Introduction to Financial Economics. The course was open for all the students who wanted to know more about financial markets and how the financial markets operate. The Department drafted a syllabus which covered most of the important topics that the students needed to know of. The course covered important topics like: importance of investment, types of investments, money market, capital market, SEBI, valuation of shares and debentures, online trading, derivatives and portfolio management. The total numbers of students enrolled for the course were 16, most of them being TYBA Economics students. The faculty for the course included both in house and external faculty. The external faculty invited for the course was Ms. Gail Zacharia. The total numbers of sessions conducted for the course were 14. The feedback received from the students regarding the course was very good. Students were pleased and happy to gain added knowledge of a subject that is of immense importance today and the same knowledge can be used by them for their future reference as far as studies or job is concerned.
